

# Who's Protecting OUR Children Online

**GV3TLOVE**

Good Vibrations  
Truth Trust Transparency  
**LOVE**

# OUR SOLUTION IS LIVE AT THE APPSTORE

**Which Magazine** have confirmed 1 billion hackable android phones are in circulation, although **ALL** devices are connected to an unregulated, manipulative and in parts, a mentally debilitating digital universe, something the EU president was deeply concerned about in her recent speech.

## **WardWiz** + OPSWAT

WardWiz, originally from Germany and now based near Frankfurt, Germany, is in the IT security solutions space. WardWiz offers WardWiz System Essentials, a package for personal and professional use of computer systems. Built by a team of experienced professionals in the networking and computer business, WardWiz offers its customers advanced IT security solutions. WardWiz isn't just an antivirus brand. It has been packed with services that well exceed the boundaries of virus protection, offering utilities in enhancing system performance.

## **GV3TLOVE** – Good Vibrations Truth Trust Transparency and **LOVE**

GV3TLOVE has partnered with Ward Wiz to bring their software to our global community and protect us all online.

There are multiple features within our package that covers one main laptop and two mobile phones. The PARENTAL CONTROL (Protection) feature delivers a secure boundary in the fight against hardcore content and the algorithms that plague our children, meaning that together we can deliver the protection they need against those who would seek to manipulate their minds. The profit from our monthly subscription will be directed into a new media partnership with BGNTV, delivering News, TV, Film and Social Media, to a globally connected and protected audience, providing content that empowers and inspires our children from the subscription based model.

# SAME NAME – SAME DREAM – SAME TEAM?

## How This Politician Put Britain at the Forefront of the War Against Facebook

*"We need a radical shift in the balance of power between the platforms and the people," Collins said in a statement Monday morning. "The age of inadequate self-regulation must come to an end." In its response to the report, Facebook said it is open to "meaningful regulation."* **DAMIAN COLLINS MP**

*"Meaningful regulation is only achieved by unifying our collective expertise to empower, educate and provide each PARENT with the definitive ability to protect their own children online"* **DAMIAN LANGIANO PROTECTOR OF CHILDREN**

# PROTECTOR OR AN INNOCENT “PROVIDER” TO ONLINE ABUSE?

“Proud of the team who rapidly put together the Vodafone schools.connected programme back in November. Now **350k** sims have been distributed to pupils and students who struggle to access education from home because they don’t have the right connectivity”

“Hi Damian, all SIMs are pre-configured to block age restricted content prior to distribution. Schools then allocate them to pupils and recommend the appropriate online resources”. (Hi Damian, the SIM’s would be configured with ACF (Adult Content Filtering) which would stop access to adult materials whilst using.)

“We’ve teamed up with Mailforce (Charity) to expand our schools.connected programme to 500k. So many children up and down the country need our support to get them the connectivity and education they need.” 20<sup>th</sup> January 2021

Max Taylor - Consumables Director

**BIG TECH ENCOURAGING TEACHERS TO BYPASS PARENTS – RESULTING IN EXPOSING THEIR CHILDREN TO BE ABUSED ON UNDER AGE SITES – VODAFONE HAVE ALREADY PUT 350K DISADVANTAGED CHILDREN INTO THE UNREGULATED WORLD**

***[www.Mylol.com](http://www.Mylol.com) is one of hundreds of underage teen sites and networks that huge numbers of **paedophiles** are targeting and would be downloadable even with age restricted content placed on the Sim.***

# STEVE MURRELLS – DID YOU REALLY PUT THIS IN WRITING?

1. “From a tech point of view our focus has been about ensuring that children in our Co-op Academies (& some local communities), regardless of their background, have access to a technology device so that they can continue learning from home. There’s many that don’t have access to a device and so were being unfairly disadvantaged through no fault of their own.

And so, whilst there’s real merit in the work you’re looking at around security/ safety, **this isn’t something we’re focussed on** and so not something we’d be in a position to progress conversations on”

2. “As I mentioned **cyber-security for young people isn’t an area of focus** for us right now and so we’re not in a position to take these conversations further.

We continuing to prioritise our funding on access to food, mental wellbeing services and education & employment for young people”

Emailed to me by Steve Murrells CEO of the CO-OP

**IN BRIEF THE CO-OP IS PROVIDING TECH TO DIS-ADVANTAGED CHILDREN WITH NO FOCUS UPON “YOUNG PEOPLES ONLINE SAFETY” - see thread for risk exposure**

# GAMIFICATION FOR THE PROTECTOR AND THE ABUSER ALIKE

NSPCC

NSPCC state that the internet is a place where children and young people can learn and have fun on their own or with friends. However we also know there are risks and understand it can be difficult to know to help keep them safe whilst they explore. That's why we run workshops to give parents the tools and information they need to help keep their children safe online.

The [NSPCC](#) has been delighted to partner with [Attensi](#) on this pioneering 3d interactive simulation. It's a pilot designed to help adults engage with children who might be experiencing abuse - have a go and let me know what you think!

Thank you for sharing Sir Peter Wanless - It has been such a privilege collaborating with your team. To anyone who wants to try it out or share, here is a link to the NSPCC learning page – HUW NEWTON-HILL

**“HAVE A GO” – “OR SHARE IT ABOUT”**

If we add...Channel 4 Documentaries Senior Commissioning Editor, Alisa Pomeroy said: “This powerful series is both timely and vitally important. As a direct result of COVID, **millions of children** are now stuck at home, bored, hidden away in their bedrooms and chatting online. Each potentially laying themselves open to the sinister practice of online grooming by an increasing number of would-be sexual abusers.”

**SIR PETER, SADLY THAT'S THE NSPCC PROVIDING TUITION ON HOW TO RECOGNISE CHILDREN THAT ARE BEING ABUSED AND SIMULTAINIOUSLY **TEACHING “ABUSERS”** HOW TO ENGAGE AND OBTAIN THEIR TRUST?**

# EU PRESIDENT URSULA VON DER LEYEN SEES THE ISSUE!

## "REDUCE YOUR SCREEN TIME"

The issue with the above statement is that dopamine addictive content structures plague our unprotected children. Sadly, it's like saying to a junkie "Don't inject it's not good for your health" when they are already addicted. It's the dealers of this content that need to be confronted, because next they will profess to provide the solution and that "move" will further increase data harvesting and the cycle of addiction.

AI will be and I believe is being used on children's messages via a children's rescue charity. They will funnel the 2.1B children's messages into a AI system and use them to programme our children. Our system provides parents the means to protect against this and act upon these ongoing digital attacks.

In case you missed it at Davos, Ursula von der Leyen's call for safer social media.

<https://wef.ch/2Yil7RM>

Tristen Harris and his Social Dilemma documentary proved GOOGLE's manipulation of 2Billion people, stating those in charge took the steps of keeping their children away from Tech and Social Media, Screened Out and countless other studies and commentators prove this to be the case. This translates to our parents and children not being able to TRUST these platforms and WW-GV3TLOVE provides an instant recovery option and one that will sit at the heart of our children's mental health repair.

# THIS DECISION LED TO A PAINFULLY POOR DEFENCE!

Gary thanks for your regular emails., we will contact you directly if we would like to take the conversation forward.  
Feb 20 2020

Richard Arnold MD of Manchester United has multiple emails and has been tagged in a flow of LINKEDIN call-outs and outreaches.

I will confirm at this time Ward Wiz were focusing on the cyber security element as COVID hadn't hit and the children we are now focusing on were still at school. It was after reaching out to Damian Collins (see below) that we reverted to MUFC given the fanbase and ease at which they could connect to ALL football clubs and to create a UNITED boundary between the sexual abuse running through this presentation and our children.

Marcus Rashford and Damian Collins were both made aware by email of a collaboration opportunity and both failed to respond and Collins continues the same on all formats.

# THE CLOCK IS TICKING FOR OUR CHILDREN – AT EURO 2020

TikTok announces it has become an official global partner of UEFA EURO 2020. TikTok will launch a range of fan engagement features such as AR effects, Hashtag Challenges, TikTok LIVEs and Sounds, in addition to fans being able to follow football creators, share football content and create their own moments throughout the tournament. Football content has had a meteoric rise on TikTok, with over 70 billion views on the #football hashtag

**TikTok app used by paedophiles for grooming gets age limit in US - but not UK**  
**EXCLUSIVE: American children are forced to prove they are over 13 to use TikTok**

NSPCC welcomed the changes. Andy Burrows, the charity's head of child safety online policy, said: "This is a bold package of measures by TikTok and a hugely welcome step that will reduce opportunities for groomers to contact children. It comes as abusers are taking advantage of the pandemic to target children spending more time online, and we urge other platforms to be similarly proactive rather than wait for regulation to come into effect. The full benefits of these changes will be felt when age assurance measures are put in place in **SEPTEMBER** when the age appropriate design code comes into force."

**Euro2020 Start date June 11<sup>th</sup> 2021 End July 11<sup>th</sup> 2021**

**WARDWIZ-GV3TLOVE CAN'T BLOCK THE APP OR MANAGE IT'S PERFORMANCE – HOWEVER WE DO PROVIDE THE ABILITY FOR THE PARENT TO CONTROL ALL DOWNLOADS ON EACH CHILDS DEVICE – AND THEIR SCREEN TIME USAGE - #PROTECTION**

# CREATING A TRULY SAFE ENVIROMENT

I don't want to get too far down the road, but a subscription model will provide funds for the further development of channels for a trusted streaming platform (I am aligned to a US one with Circa 100M viewers), the addition of Member Regulated Social Media, App Creation and Mobile Communication Platforms, ALL of which adhering to the highest standards and be fortified against abusers and those who seek out our children, either sexually or through marketing manipulation.

The facts prove that our children are in the worst mental health condition of our existence and as single entity, lead with **LOVE**, compassion and the absolute understanding that we can **ALL** prosper if we are unified, inclusive and not enticed into the digital wilderness to be manipulated by the onslaught of David Ripert's (Ex Google, Netflix and YouTube) Virtual Reality drive. These parallel worlds created without thought will be the next level of addiction, digital LSD for the children already craving the dopamine hits the current scrolling creates.

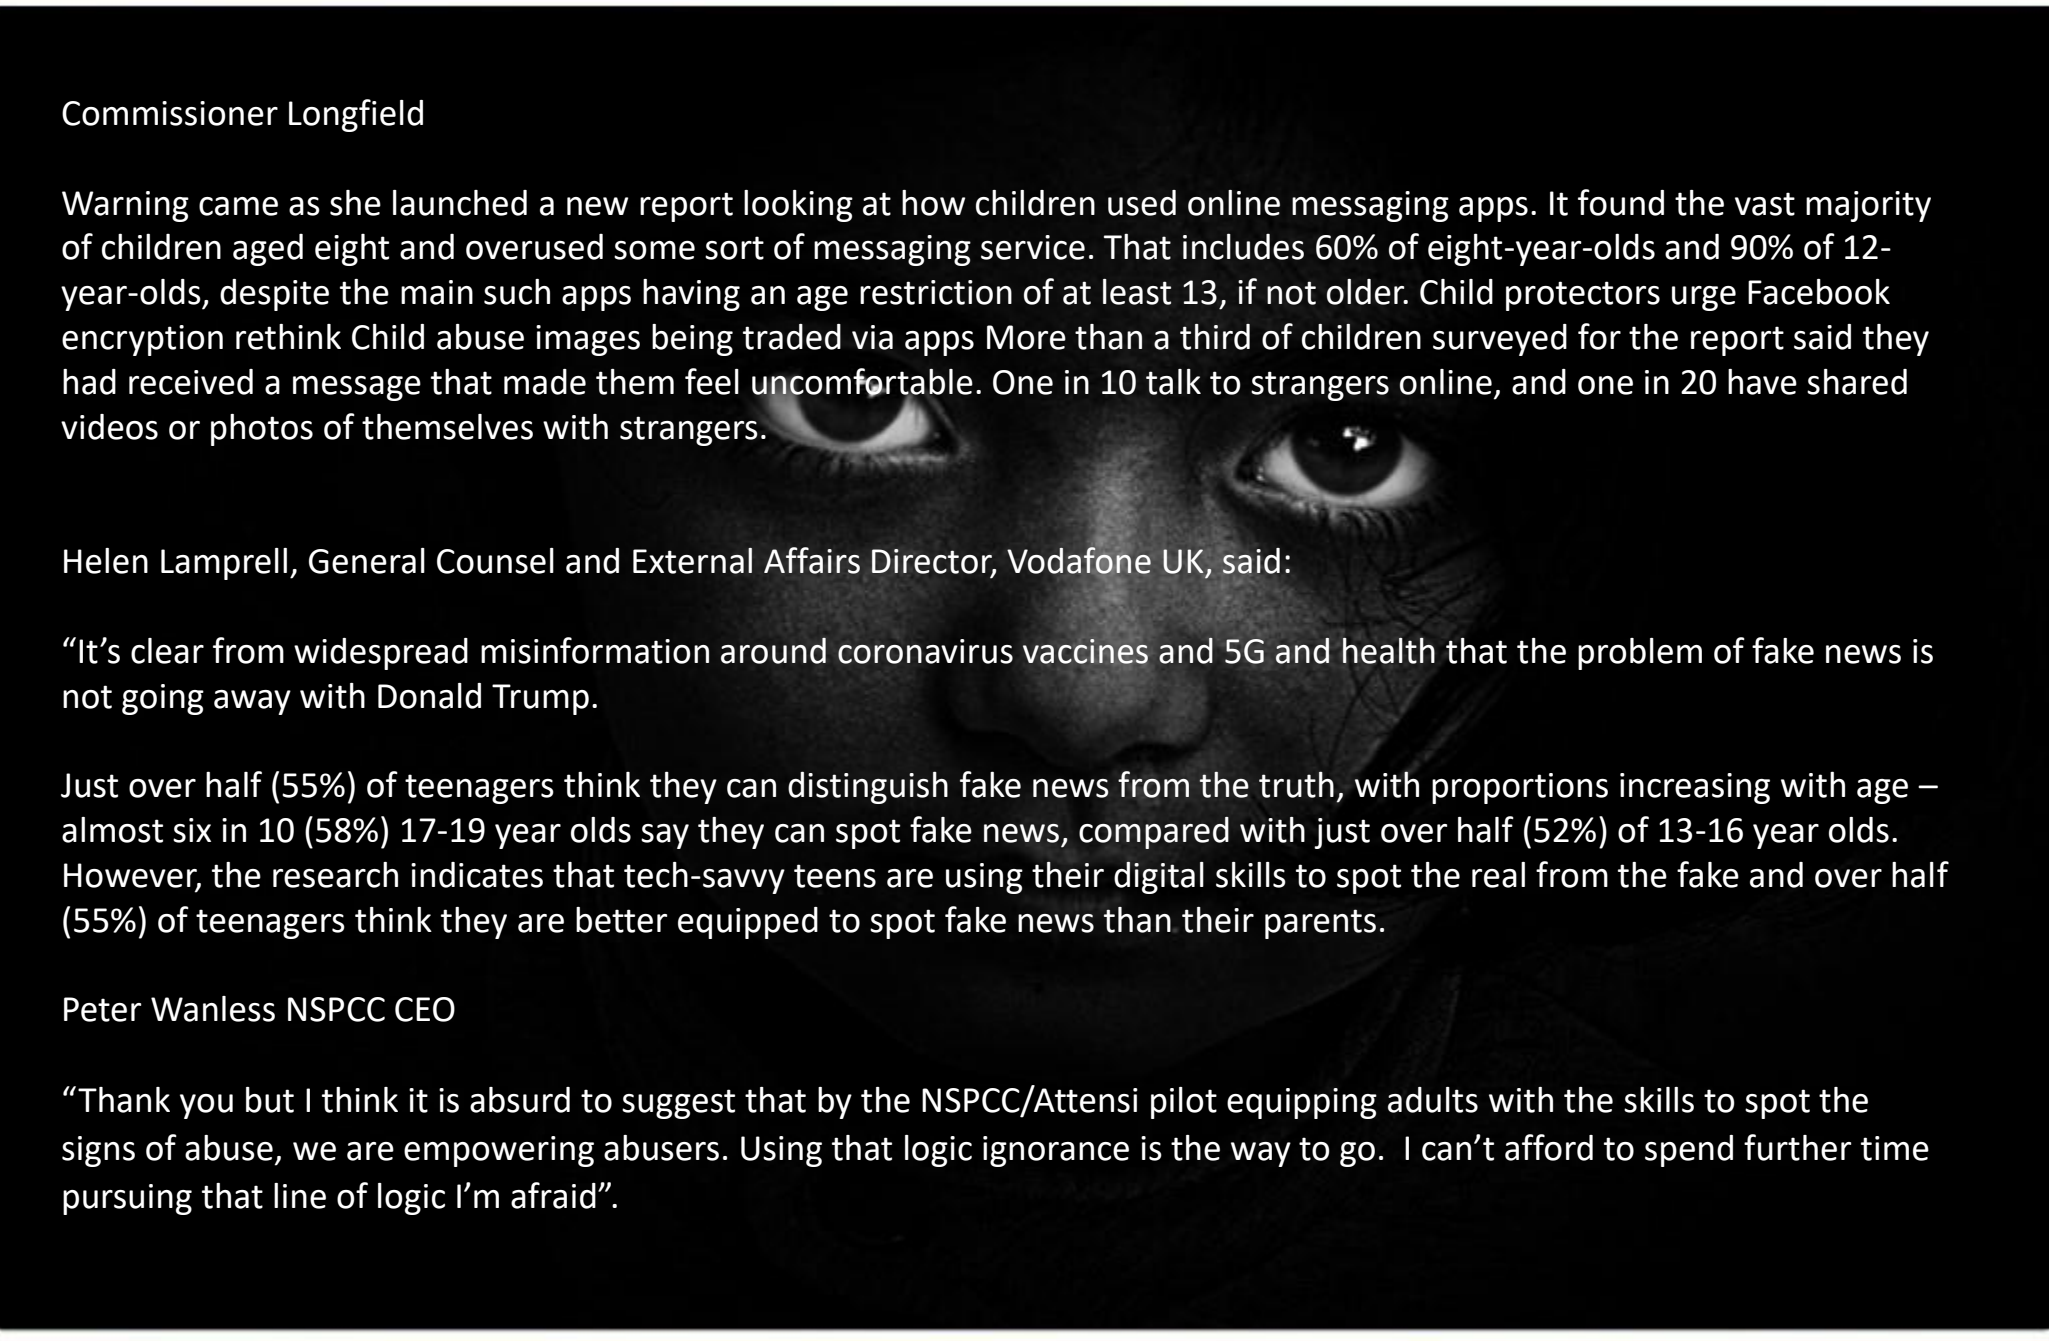

How the pioneer of the phone filters that have resulted in a third of children suffering from body dysmorphia and a false sense of reality resides on the **Save the Children** board is a major question to be answered.

# THE ONLY OPTION

We **align** and immediately deliver our software to the parents of the millions of children **your failure** to listen, act or have inadvertently exposed online. I have **proven** that for the last year these children have been susceptible to abuse, dopamine and mental health debilitating content, manipulation and the grooming from a huge numbers of **paedophiles** you are now about to **educate** to recognise these vulnerable children and know exactly how to approach them to gain their trust.

***“What we do in life echo's in eternity”***

***What YOU choose to do in the next minutes will determine our children's future and your own.***

Commissioner Longfield

Warning came as she launched a new report looking at how children used online messaging apps. It found the vast majority of children aged eight and over used some sort of messaging service. That includes 60% of eight-year-olds and 90% of 12-year-olds, despite the main such apps having an age restriction of at least 13, if not older. Child protectors urge Facebook encryption rethink Child abuse images being traded via apps More than a third of children surveyed for the report said they had received a message that made them feel uncomfortable. One in 10 talk to strangers online, and one in 20 have shared videos or photos of themselves with strangers.

Helen Lamprell, General Counsel and External Affairs Director, Vodafone UK, said:

“It’s clear from widespread misinformation around coronavirus vaccines and 5G and health that the problem of fake news is not going away with Donald Trump.

Just over half (55%) of teenagers think they can distinguish fake news from the truth, with proportions increasing with age – almost six in 10 (58%) 17-19 year olds say they can spot fake news, compared with just over half (52%) of 13-16 year olds. However, the research indicates that tech-savvy teens are using their digital skills to spot the real from the fake and over half (55%) of teenagers think they are better equipped to spot fake news than their parents.

Peter Wanless NSPCC CEO

“Thank you but I think it is absurd to suggest that by the NSPCC/Attensi pilot equipping adults with the skills to spot the signs of abuse, we are empowering abusers. Using that logic ignorance is the way to go. I can’t afford to spend further time pursuing that line of logic I’m afraid”.

### The Development of the Duty of Care

The legal basis for finding a duty of care has its roots in *Donoghue v Stevenson* [1932] AC 562. Although, as will be noted below, there exists a more modern test to establish a duty of care, *Donoghue v Stevenson* provides the theoretical basis for the duty of care, and thus modern negligence, and so it is necessary to be familiar with the case.

Before *Donoghue v Stevenson*, the concept of duty of care did not exist in any particularly notable form within the English law. This meant that unless a plaintiff had a contract with a defendant, they had no means of bringing a case in negligence. This led to a considerable number of injustices when individuals were injured by clear instances of negligence. An example of this phenomenon can be seen in *Winterbottom v Wright* (1842) 10 M&W 109. In the case, the defendant (Wright) was contracted by the UK's Postmaster-General to maintain a horse-drawn mail coach in a safe state. The plaintiff (Winterbottom) was also contracted by the Postmaster-General to drive the coach between destinations but was injured when the coach collapsed due to disrepair. Although it was clear that Wright had acted negligently, the courts held that Winterbottom could not sue Wright, because a contract did not exist between the two. In essence, the contract concept of privity prevented legal action.

It does not take a huge amount of insight to see the problems that might have arisen as a result of the above decision. For example, a consumer injured by a bottle mistakenly filled with acid rather than soda would have no legal recourse if somebody else purchased the soda for them. Similarly, since road users do not have contracts with each other, none could be said to owe each other a duty of care, no matter how dangerously they were driving. This is clearly problematic - we want our soda producers to ensure their products are safe, and we want drivers on the road to be careful, and the threat of being sued is a useful deterrent to unsafe behaviour.

It is, therefore, fortunate that the courts established the generally applicable concept of duty of care in *Donoghue v Stevenson*. It should be noted that the concept of a duty of care was not created specifically in *Donoghue*; instead, it was restricted to a few, highly specific situations. Thus, statements that the courts 'invented' or 'created' the duty of care concept in *Donoghue* are false, and should be avoided. Instead the courts can be thought of as greatly widening the remit of the concept.

# DUTY OF CARE

## ***Case in Focus: Donoghue v Stevenson [1932] AC 562***

The case itself involved a relatively simple (and now famous) set of facts. The plaintiff (Mrs Donoghue) visited a café in August of 1928 with a friend. The friend purchased an opaque bottle of ginger beer for Mrs Donoghue and decanted most of it into a glass tumbler for her to drink. After Mrs Donoghue had consumed the glass of ginger beer, her friend poured the remainder of the bottle into the glass, which to both Mrs Donoghue and her friend's surprise, contained a partially decomposed snail. As a consequence, the plaintiff suffered from 'shock and illness', and subsequently brought a case against the manufacturer of the ginger beer (Stevenson) for £500, asserting that it had failed in its duty to prevent foreign objects from making their way into its products. Following *Winterbottom*, the case was rejected in both of the lower courts, before being appealed to the House of Lords where it was successful, and Donoghue was awarded damages.
