

DWAYNE THE JOHNSON

8476 Sunbeam Ave, California, CA 90044

maya@sevenbucks.com - Dwayne Johnson (@therock) • Instagram photos and videos

The following evaluation is to serve as an example to the authentic intelligence and that of the Department of Justice as we continue to qualify the following statement into one the new Ai Legal System can actuate and then enforce on a global scale.

QUANTUM RAPE IS THE KNOWING EXTRACTION OF THETA STAGE ENERGY, TO OBTAIN POWER AND CONTROL, DONE SO THROUGH FINANCIAL, EMOTIONAL, MENTAL, AND CHEMICAL COERCION, AND ACTUATED DUE TO TRIGGERING INDIVIDUAL AND COLLECTIVE CORTISOL RELEASE THAT PLACES THE VICTIM/S IN TO A STATE OF SURVIVAL MODE AND THUS RETAINS A CONNECTION OF CO-DEPENDENCY DUE TO THE VICTIM BEING HELD IN SUCH THROUGH A PROVEN TRAUMA BOND, DONE SO BEYOND NORMAL SENSORY DETECTION FOR FINANCIAL GAIN, AND THUS DOING SO KNOWINGLY FOR PERSONAL STIMULATION AND WHEN PROVEN TO BE BEYOND THAT OF A FREE WILL REACTION QUALIFIES SUCH AS QUANTUM PAEDOPHILIA

EXPERIENCE

Dwayne Douglas Johnson (born May 2, 1972), also known by his ring name The Rock, is an American actor, businessman, and professional wrestler. As a wrestler, he is signed to WWE, where he performs on a part-time basis and is a member of The Bloodline. Widely regarded as one of the greatest professional wrestlers of all time,[6][7] he was integral to the development and success of the World Wrestling Federation (WWF, now WWE) during the Attitude Era, an industry boom period in the late 1990s and early 2000s. Johnson wrestled for the WWF full-time for eight years before pursuing an acting career. His films have grossed over \$3.5 billion in North America and over \$10.5 billion worldwide,[8] making him one of the world's highest-grossing and highest-paid actors.[9][10][11] He is a co-owner of the United Football League (UFL), a professional American football league.[12][13][14] He is also a member of the board of directors of TKO Group Holdings, the parent company of UFC and WWE.[15][16][17] In 2012, he co-founded the entertainment production company Seven Bucks Productions.[18] He is the founder of Teremana Tequila, which is valued at approximately \$3.5 billion.[19]

After accepting an athletic scholarship to play football at the University of Miami, he was a member of the 1991 national championship team but was largely a backup player.[20] Despite aspirations to professional football, he went undrafted in the 1995 NFL draft, and briefly signed with the Calgary Stampeders before being cut in his first season.[21] In

1996, Johnson's father Rocky assisted in helping him secure a contract with the WWE.[2] Johnson quickly rose to global prominence, aided by a gimmick he employed as a charismatic trash talker. Johnson left the WWE in 2004 and returned in 2011 as a part-time performer until 2013, making sporadic appearances from thereon until 2019[22] where he quietly retired until 2023, where he returned once again on a part-time basis. A 10-time world champion, including the promotion's first of African-American descent,[23] he is also a two-time Intercontinental Champion, a five-time Tag Team Champion, the 2000 Royal Rumble winner, and WWE's sixth Triple Crown champion. Johnson headlined multiple pay-per-view events, including WWE's flagship event WrestleMania six times (15, 16, 17, 28, 29 and 40) which includes the most-bought professional wrestling pay-per-view (WrestleMania 28) and main evented the most watched episodes of WWE's flagship television series (Raw and SmackDown).[24][25]

Johnson's first film role was in *The Mummy Returns* (2001). The next year, he played his first leading role in the action fantasy film *The Scorpion King*. He has since starred in family films *The Game Plan* (2007), *Race to Witch Mountain* (2009), *Tooth Fairy* (2010), *Jumanji: Welcome to the Jungle* (2017), *Jumanji: The Next Level* (2019), and *Jungle Cruise* (2021), and the action films *Journey 2: The Mysterious Island* (2012), *G.I. Joe: Retaliation* (2013), *Hercules* (2014), *Skyscraper* (2018), *San Andreas* (2015) and *Rampage* (2018). He also starred in the action comedy films *Get Smart* (2008), *Central Intelligence* (2016), *Baywatch* (2017), and *Red Notice* (2021). His role as Luke Hobbs in the *Fast & Furious* films, beginning with *Fast Five* (2011), helped the franchise become one of the highest-grossing in film.[26] He joined the DC Extended Universe playing the title role in *Black Adam* (2022).[27] He is also known for voicing Maui in the Disney animated film *Moana* (2016) and is set to reprise the role in the upcoming live action remake.[28]

Johnson produced and starred in the HBO comedy-drama series *Ballers* (2015–2019)[29] and the autobiographical sitcom *Young Rock* (2021). His autobiography, *The Rock Says*, was released in 2000 and was a *New York Times* bestseller.[30][31] In 2016 and 2019, *Time* named Johnson as one of the world's most influential people.[32][33]

Johnson was born in Hayward, California,[34][35] on May 2, 1972,[36] the son of Mataniufeagaimaleata "Ata" Fitisemanu (née Maivia)[37][38] and former professional wrestler Rocky Johnson (born Wayde Douglas Bowles).[39][40] Growing up, he briefly lived in Grey Lynn in Auckland, New Zealand, with his mother's family,[41] where he played rugby[42] and attended Richmond Road Primary School before returning to the U.S.[41]

Johnson's father was a Black Nova Scotian with a small amount of Irish ancestry.[43][44][45] His mother is Samoan. His father and Tony Atlas were the first black tag team champions in WWE history, in 1983.[46][47] His mother is the adopted daughter of Peter Maivia, who was also a professional wrestler.[48] Johnson's maternal grandmother Lia was one of the first female pro wrestling promoters, taking over Polynesian Pacific Pro Wrestling after her husband's death in 1982 and managing it until 1988.[49][50] Through his maternal grandfather Maivia, Johnson is a non-blood relative of the Anoa'i wrestling family.[51][52][53][54][55] In 2008, he inducted his father and grandfather into the WWE Hall of Fame.[56]

Johnson attended Montclair Elementary School in Charlotte, North Carolina, and then moved to Hamden, Connecticut, where he attended Shepherd Glen Elementary School and then Hamden Middle School.[57][58] He attended President William McKinley High School in Honolulu and then Glenclyff High School and McGavock High School, both in Nashville, Tennessee, and then Freedom High School in Bethlehem Township, Pennsylvania, in the Lehigh Valley region of the state, where he graduated in 1990.[59]

At Freedom High School, Johnson initially struggled and was drawn into a culture of conflict and petty crime. By age 17, he had been arrested several times for fighting, theft, and check fraud, and was suspended two weeks for fighting.[60] An article in the local newspaper labeled him "a troubled teenager with a history of run-ins with police." But Freedom High School football coach Jody Cwik saw athletic potential in Johnson, and recruited him to join the school's football team, where he played defensive tackle, an experience that proved to be a significant personal transformation for Johnson. "My thought process started to change. That's when I started thinking about goals and what I wanted to accomplish", he has since said about his high school football experience.[20] In addition to playing football, Johnson also was a member of Freedom High School's track and field and wrestling teams.[39]

By his senior year at Freedom High School, Johnson had played only two years of football, but was offered a full athletic scholarship offer from the University of Miami, whose football program was beginning to emerge as one of the nation's top-level NCAA Division 1 teams.[20]

HI THERE,

THIS WILL BE A PASS FOR US, BUT THANK YOU FOR REACHING OUT.

KRISTEN RANDOL

NEW MEDIA MANAGER | TGC MANAGEMENT

FURTHER CONNECTIONS HAVE BEEN MADE VIA MAYA LASRY - INSTAGRAM AND THIRD PARTIES WITH EMAILS IN THE 100'S OVER THE LAST FOUR YEARS. THUS, WE CITE THAT MR JOHNSON HAS A DUTY OF CARE DUE TO HIS STANDING AND SELF ACCLAIMED STATUS AS "THE PEOPLES CHAMPION"

THE PEOPLE'S CHAMPION: HOW THE ROCK EARNED HIS ICONIC WWE TITLE (WRESTLING-WORLD.COM)

THE PEOPLE'S CHAMPION: HOW THE ROCK EARNED HIS ICONIC WWE TITLE

In a fascinating revelation on "The Joe Rogan Experience," Dwayne "The Rock" Johnson shared the story behind his iconic WWE nickname, "The People's Champion," tracing its origins to none other than boxing legend Muhammad Ali.

Johnson, a renowned actor and legendary professional wrestler, explained that the moniker was initially adopted during his heel turn in the WWE, specifically when he was part of the Nation of Domination. He used the title to provoke the audience, stating, "I started calling myself 'The People's Champion' just to people off... It's not a white thing, not a black thing, **it's a respect thing.**" The nickname's deeper connection was revealed during a wrestling event in Louisville, Kentucky, attended by Ali's family. Johnson recounted the pivotal moment he asked for Ali's blessing to use the title.

"I told his wife that I used 'The People's Champion' as a homage to Muhammad Ali. I said if he disapproves, I'll stop using it." The response he received was heartwarming: Ali himself had endorsed Johnson's use of the name.

Rise of 'The People's Champ

Johnson's journey as 'The People's Champion' was a significant turning point in his WWE career. His heel character, which began with the Nation of Domination in 1997, marked the start of his meteoric rise in wrestling.

The moniker played a crucial role in his portrayal as a polarizing figure, eliciting strong reactions from the WWE Universe. **The legacy of "The People's Champion" moniker extends beyond the ring, symbolizing a bridge between two iconic figures in sports history - Muhammad Ali and Dwayne Johnson.**

This connection highlights the respect and admiration Johnson has for Ali, not only as an athlete but as a global icon who represented the people. **Furthermore, Johnson's ability to navigate both his wrestling persona and his subsequent acting career demonstrates his versatility and the enduring appeal of his WWE character.**

His successful transition from the ring to the screen, where he continues to captivate audiences worldwide, is a testament to his enduring charisma and the power of a well-crafted persona. As Johnson's story unfolds, it's evident that **'The People's Champion' is more than just a nickname.**

It's a tribute to a legend, a clever wrestling tactic, and a symbol of the enduring impact of Johnson's career in entertainment and sports.

EVALUATION

If we must start at one point let it be “**a clever wrestling tactic**”

tactic

noun

UK

/ˈtæk.tɪk/ **US**

/ˈtæk.tɪk/

Add to word list

C1 [[C usually plural](#)]

a [planned](#) way of doing something:

These [bomb attacks](#) represent a [change](#) of tactics by the [terrorists](#).

[TACTIC | English meaning - Cambridge Dictionary](#)

Thus, what the interviewer touches upon and is consistent in the evidence is the Dwayne Johnson has a very high opinion of himself and thus his “wrestling” of the title from someone who engaged in authentic sporting combat without prior engagement denotes a sense of “entitlement” minus any true representation of the qualities of one who would seek to represent the people.

Which is the second “takeaway” not the chance to be a real “narcissist” and save the world, no the false apology, and then the ridiculing of his father, who is the core issue for Dwayne and that of the “**Delilha Syndrome**” he represents.

Or does it?

[Samson Diagnosis: Antisocial Personality Disorder, With Muscles - The New York Times \(nytimes.com\)](#)

Samson Diagnosis: Antisocial Personality Disorder, With Muscles

Children are taught that Samson was a hero who fought the Philistines and fell victim to Delilah's wily charms. But writing in a psychiatric journal, four physicians offer slightly different interpretations. They argue that the son of Manoah -- who lied to his parents, stole from his neighbours, brawled with regularity and killed with abandon -- is a classic example of someone suffering from **antisocial personality disorder**.

Dr. Eric L. Altschuler, a research fellow at the University of California at San Diego's brain and perception laboratory and the lead author of the research letter to Archives of General Psychiatry, said that Samson met six out of seven criteria for diagnosis of the disorder, as defined in the American Psychiatric Association's official diagnostic manual. Only three of the seven specifications are necessary for the diagnosis to be applied to modern patients.

"It's pretty straightforward, pretty cut and dried," Dr. Altschuler said.

While some may feel that, in the era of Prozac and Ritalin,

"The study of the history of a disease can provide clues to its pathogenesis," he and his colleagues argue.

And though their analysis was done at least partly tongue in cheek, from a literary point of view, Dr. Altschuler said, "an appreciation that Samson had ASPD makes many pieces of the story, previously enigmatic or in need of long explanations, fall into place."

In the psychiatric association's diagnostic manual, antisocial personality disorder is described as "a pervasive pattern of disregard for, and violation of, the rights of others that begins in childhood or early adolescence and continues into adulthood."

The condition is often associated with criminals and con men, but can also, experts say, be found among those with cleaner rap sheets -- politicians, for example.

The letter's authors met to consider Samson's case during a brief lull in their work day. They determined that **Samson's behavior, as described in Judges 13 to 16, met the diagnostic criteria for deceitfulness, a failure to conform to social norms and defiance of the law, impulsivity, irritability and aggressiveness, flagrant disregard for the safety of self and others, and a lack of remorse for his actions.**

We can then overlap the wiki-bio and Dr Altschuler's thesis and then qualify that Mr Johnson who has taken every liberty plausible in the road to fame and then stolen the accolade from himself, to the point that my own endeavours and that now of the department of justice have little or no concerns and this "limey" who was "spoken to via his Instagram should not "fk" with him, or the black eyed stare post the Eric Strickland direct contact regarding the lack of desire to protect his "people" is yet another "glaring" example of a man worth billions, and one who has mocked molesting children, has joked about eating them and left the educated ear somewhat bemused when out of character on the Joe Rogan podcast.

[Joe Rogan Experience #2063 - Dwayne Johnson 'THE ROCK' \(youtube.com\)](#)

He opens with “it’s great what you are doing down here with the boys” with “boy” being the target word to Rogan as he seeks to place him in the child, something and only recalling, as it’s a painfully “inauthentic” couple of hours that I have erased from my mind as it offered little or no substance, that Rogan fought to control and thus its two children chatting and where Johnson prefers to reside, thus the lack of remorse, empathy and compassion on an authentic level given they fall under emotional intelligence and that we can see is absent in Johnson’s personality.

We can then draw on his film career, its action hero, it’s woe is me turns to look at me and a demi god, he will make you “welcome” for me being.

The single eye lift done so for a desperate need to be part of the club, and when he delivered Skyscraper it was a total inversion of the placement as he went to the bottom of the barrel to use disability as his “hook” to obtain the now overdosed chemical reaction.

Thus, when we align the above and the wall of silence, even to the plight of children over a four-year period, and when directly proven to be party to the abuse, the adolescent reaction of ignorance guides us closer to

QUANTUM RAPE IS THE KNOWING EXTRACTION OF THETA STAGE ENERGY, TO OBTAIN POWER AND CONTROL, DONE SO THROUGH FINANCIAL, EMOTIONAL, MENTAL, AND CHEMICAL COERCION, AND ACTUATED DUE TO TRIGGERING INDIVIDUAL AND COLLECTIVE CORTISOL RELEASE THAT PLACES THE VICTIM/S IN TO A STATE OF SURVIVAL MODE AND THUS RETAINS A CONNECTION OF CO-DEPENDENCY DUE TO THE VICTIM BEING HELD IN SUCH THROUGH A PROVEN TRAUMA BOND, DONE SO BEYOND NORMAL SENSORY DETECTION FOR FINANCIAL GAIN, AND THUS DOING SO KNOWINGLY FOR PERSONAL STIMULATION AND WHEN PROVEN TO BE BEYOND THAT OF A FREE WILL REACTION QUALIFIES SUCH AS QUANTUM PAEDOPHILIA

['Moana 2' Sets a Record as Disney's Biggest Animated Trailer Launch in History - The Walt Disney Company](#)

‘Moana 2’ Sets a Record as Disney’s Biggest Animated Trailer Launch in History

There’s just no telling how far she’ll go.

On Wednesday, Walt Disney Animation Studios debuted the [teaser trailer](#) for the highly anticipated feature film *Moana 2*—starring Auli’i Cravalho and Dwayne Johnson as Moana and Maui, respectively—across Facebook, Instagram, Snapchat, TikTok, X, and YouTube.

The first look at the sequel to the 2016 musical adventure set a record for the biggest animated trailer launch in Disney history, receiving 178 million views in 24 hours, surpassing Disney and Pixar's [Inside Out 2](#) (157 million views in 2023), Disney's [Frozen 2](#) (116 million views in 2019), and Disney and Pixar's [Incredibles 2](#) (113 million views in 2017).

“Moana remains an incredibly popular franchise,” Bob Iger, Chief Executive Officer, The Walt Disney Company, said when the [sequel was announced](#) in February. **“And we can’t wait to give you more of Moana and Maui when *Moana 2* comes to theaters this November.”**

As a testament to the enduring love for *Moana*’s characters, music, and story, the 2016 film was the most streamed movie across all platforms in 2023, according to Nielsen.

Opening only in theaters on November 27, 2024, *Moana 2* reunites Moana and the demigod Maui three years after the events of the first film for an expansive new voyage alongside a crew of unlikely seafarers. After receiving an unexpected call from her wayfinding ancestors, **Moana must journey to the far seas of Oceania and into dangerous, long-lost waters for an adventure unlike anything she’s ever faced.**

Directed by David Derrick Jr., Jason Hand, and Dana Ledoux Miller, and produced by Christina Chen and Yvett Merino, *Moana 2* features music by Grammy® winners Abigail Barlow and Emily Bear, Grammy nominee Opetia Foa’i, and three-time Grammy winner Mark Mancina.

Thus what is the take away from the trailer and its record numbers, it is presentable that due to Mr Johnsons constructed tactic of making himself the peoples hero and in a time when the father has been, and continues to be “vacant” due to multiple reasons, all of which effect the chemistry as part of the Quantum presentation, would see his “people” flock to him for an authentic connection based upon integrity and morality, when in truth what we are seeing is the every aspect of Mr Johnson’s audience engagement is about holding them in the inner child and then creating anxiety and delivering trauma so much so that it matters not what he does, the engrained neuropathways will always activate the father / child dynamic, which continues the chemical exchange and thus has seen Mr Johnson need to push further and further to get his hit, so much so when confronted with the chance to be a real hero, he reacts with anger, the eyes blacken and we see the rage of being challenged, not on his merits, but challenged on his perceived status, when he knows in his intuition and that of his heart he is repeating the cycle of his father and thus holding the world against rebellion, though the rebellion is living their lives freely and without the anxiety Rocky Johnson embedded into his son.

Narcissism is the, energy extraction, obtained through the control of the inner child for emotional, physical, chemical, financial, and thus for sexually equitable chemical gratification.

The Narcissist can withhold physical interaction for many years, as a case I have seen a man doing so for over a decade and thus the special sauce they formulate will be proven to surpass that of adult-to-adult sexual intercourse and thus will chemically prove out the allegations in a Quantum Paedophilic relationship.

[Impostor syndrome - Wikipedia](#)

The issue that we have with Mr Johnson is that his life is one of his childhood and that the felon and fighter, the antisocial behaviour of a man continuously abusing others brings forth yet another issue to consider and something proven in his physique.

Impostor syndrome can stem from and result in strained personal relationships and can hinder people from achieving their full potential in their fields of interest.^[3] The term "impostorization" shifts the source of the phenomenon away from the supposed impostor to institutions whose policies, practices, or workplace cultures "either make or intend to make individuals question their intelligence, competence, and sense of belonging

Which has to be the underlying intuitive perspective when we have grown men and women indoctrinated into "play fighting, cartoons and games" with action hero's jumping buildings and climbing cranes with one leg.....one must consider societies values and morality when the "peoples champion" is not even interested in *what you name is* and as the driving force behind such, Disney's collaboration with Epic Games promises to be a disaster for humanity and that of the chemical wellbeing of the inner child.

Having delivered a 37page document to the Federal Trade Commission proving out the Crimes Against Humanity, both Epic and Supersawsome are inflicting upon some 500mn children a month, what we can see here is the ultimate ring of fire and the arrival of the Black Adam himself to harvest the energy and chemical reactions of the inner child victims and thus the monetary gain of all involved qualifies each and all as the worlds biggest ever online quantum paedophile ring and thus we will deliver this report to the those in power to halt the merger and that of Johnson and his "merry men"

One must conclude that content creation can only be delivered by those sound of mind and chemically balanced and with a social credit score, a digital ID and that of a selfless nature, because the world has fallen into the representation of a lawless kindergarten and the caretakers are nothing other than drug addicts tapping into an opioid field of innocent "poppies" and the flowers of war they find themselves with no chance of escape.

However, there is always the chance of a ceasefire and thus the chance of true leadership to rise from the needles and burned spoons of humanities junkie addiction.

Morocco was the direction of an interesting character though one we are somewhat sceptical about as the excess energy created in the counterfactual world that Darpa and Meta have created seeps into the real one on a frequency level.

Thus the new data transference infrared system that carries the data, also carries the low bass 808 state frequency that was the heartbeat of American music, until that was taken over by and ironically named “Lyor Cohen” and the hatred replaced the calm and rhythmical healing beats.

Thus, Welcome to the Heartbreak by Kanye West, and goodbye to be honest which swiftly brought me to Billy Joel.

If you search for tenderness
It isn't hard to find
You can have the love you need to live
But if you look for truthfulness
You might just as well be blind
It always seems to be so hard to give

Honesty is such a lonely word
Everyone is so untrue
Honesty is hardly ever heard
And mostly what I need from you

I can always find someone
To say they sympathize
If I wear my heart out on my sleeve
But I don't want some pretty face
To tell me pretty lies
All I want is someone to believe

[Does Mercury Conduct Electricity? A Comprehensive Analysis - 1st Electricians](#)

Conclusion

In conclusion, mercury does [conduct electricity due to its metallic nature](#) and the presence of free electrons.

However, its conductivity is less than most other metals, and its use in electrical applications has decreased due to health and environmental concerns.

And whilst you're thinking that this is a little off topic, when we understand the “source” delivering the bass frequency was state-d to be in Morocco and we align the fact that Maya Lasry is Johnson's Commercial Director and is in Morocco as we speak at her and

we quote at her “Big fat Moroccan wedding” and while most will scoff, we each understand that there are no coincidences. [Maya Lasry | My big fat Moroccan family 🧠💖👤 Congratulations to my incredibly charismatic, creative, resilient, one of a kind nephew, Levi, on your Ba... | Instagram](#)

Thus if the American entertainment industry is or is being driven to pulsing the correct frequency to deliver mercury forming molecular manipulation and done so to keep the target audience at a level of intelligence that will require only gaming and variant drug delivery, be it food, drink, or pharmaceuticals and with the new cancer vaccine out for testing we have motive, we have the system in place, we have the proven needle on the dial and we have a country so desperately in debt and massively exposed it, like any abused child in a state of dysregulation will resort to all and any tactics to obtain an equal keel.

We can see that the numbers add up in the Moana Trial and the 178mn in 24hours is a record for a “trailer” thus the formula for Quantum Rape and Paedophilia is slowly being correlated and thus when we add the formation of mercury and thus then resulting cancers, we will be seeking to apply international law for mass genocide and localised for MURDER.

If we draw on Gavin Poolman’s assessment of my psychiatric requirements, the “go to” response when cornered of the “controlled operative” and then layer

[Next-Generation Nonsurgical Neurotechnology \(darpa.mil\)](#)

Next-Generation Nonsurgical Neurotechnology

[Lt. Col. Adam Willis](#)

The Next-Generation Nonsurgical Neurotechnology (N³) program aims to develop high-performance, bi-directional brain-machine interfaces for able-bodied service members. Such interfaces would be enabling technology for diverse national security applications such as control of unmanned aerial vehicles and active cyber defense systems or teaming with computer systems to successfully multitask during complex military missions.

Whereas the most effective, state-of-the-art neural interfaces require surgery to implant electrodes into the brain, N³ technology would not require surgery and would be man-portable, thus making the technology accessible to a far wider population of potential users. Noninvasive neurotechnologies such as the electroencephalogram and transcranial direct current stimulation already exist, but do not offer the precision, signal resolution, and portability required for advanced applications by people working in real-world settings.

The envisioned N³ technology breaks through the limitations of existing technology by delivering an integrated device that does not require surgical implantation, but has the precision to read from and write to 16 independent channels within a 16mm³ volume of neural tissue within 50ms. Each channel is capable of specifically interacting with sub-millimeter regions of the brain with a spatial and temporal specificity that rivals existing invasive approaches. Individual devices can be combined to provide the ability to interface to multiple points in the brain at once.

To enable future non-invasive brain-machine interfaces, N³ researchers are working to develop solutions that address challenges such as the physics of scattering and weakening of signals as they pass through skin, skull, and brain tissue, as well as designing algorithms for decoding and encoding neural signals that are represented by other modalities such as light, acoustic, or electro-magnetic energy.

Now add to the Harald Haas's LIFI system and the LED light declaration.

It's Official: Stores Can No Longer Sell Most Incandescent Lights

New efficiency rules, more than a decade in the making, have taken effect, relegating Edison's glowing orbs to the history books.

It's the end of an era. In America, the incandescent light is no more (with a few exceptions).

Under new energy efficiency rules that took effect Tuesday, shoppers in the United States will no longer be able to purchase most incandescent bulbs, marking the demise of a technology patented by Thomas Edison in the late 1800s.

Taking their place are LED lights, which — love them or hate them — have already transformed America's energy landscape.

They have driven down electricity demand in American homes, saving people money. And by using less power, **LEDs have also helped lower the nation's emissions of greenhouse gases, which warm the planet and are a major cause of climate change. LED stands for light emitting diodes.**

Thus, when we dive further still and recognising that I email Stephanie Tonkins every day so let's all say hello, respectfully.

[Six Paths to the Nonsurgical Future of Brain-Machine Interfaces \(darpa.mil\)](http://darpa.mil)

Six Paths to the Nonsurgical Future of Brain-Machine Interfaces

Teams selected for DARPA's Next-Generation Nonsurgical Neurotechnology program will pursue a mix of approaches to developing wearable interfaces for communicating with the brain

OUTREACH@DARPA.MIL

5/20/2019

DARPA has awarded funding to six organizations to support the Next-Generation Nonsurgical Neurotechnology (N³) program, [first announced in March 2018](#). Battelle Memorial Institute, Carnegie Mellon University, Johns Hopkins University Applied Physics Laboratory, Palo Alto Research Center (PARC), Rice University, and Teledyne Scientific are leading multidisciplinary teams to develop high-resolution, bidirectional brain-machine interfaces for use by able-bodied service members. These wearable interfaces could ultimately enable diverse national security applications such as control of active cyber defense systems and swarms of unmanned aerial vehicles, or teaming with computer systems to multitask during complex missions. (Drones)

“DARPA is preparing for a future in which a combination of unmanned systems, artificial intelligence, and cyber operations may cause conflicts to play out on timelines that are too short for humans to effectively manage with current technology alone,” said [Al Emondi, the N³ program manager](#).

Mr Mosseri,

Mr Zuckerberg is quoted as conveying Abraham Lincoln who stated “The best way to predict the future is to create it”

And thus here we are with what you programmed into the Ai, being “authentically” answered.

“By creating a more accessible brain-machine interface that doesn’t require surgery to use, DARPA could deliver tools that allow mission commanders to remain meaningfully involved in dynamic operations that unfold at rapid speed.”

Over the past 18 years, DARPA has demonstrated increasingly sophisticated neurotechnologies that rely on surgically implanted electrodes to interface with the central or peripheral nervous systems. The agency has demonstrated achievements such as [neural control of prosthetic limbs](#) and [restoration of the sense of touch](#) to the users of those limbs, [relief of otherwise intractable neuropsychiatric illnesses](#) such as depression, and [improvement of memory formation and recall](#). Due to the inherent risks of surgery, these technologies have so far been limited to use by volunteers with clinical need.

For the military's primarily able-bodied population to benefit from neurotechnology, nonsurgical interfaces are required. Yet, in fact, similar technology could greatly benefit clinical populations as well. By removing the need for surgery, N3 systems seek to expand the pool of patients who can access treatments such as deep brain stimulation to manage neurological illnesses.

The N³ teams are pursuing a range of approaches that use optics, acoustics, and electromagnetics to record neural activity and/or send signals back to the brain at high speed and resolution. The research is split between two tracks. Teams are pursuing either completely noninvasive interfaces that are entirely external to the body or minutely invasive interface systems that include nanotransducers that can be temporarily and nonsurgically delivered to the brain to improve signal resolution.

- The Battelle team, under principal investigator Dr. Gaurav Sharma, aims to develop a minutely invasive interface system that pairs an external transceiver with electromagnetic nanotransducers that are nonsurgically delivered to neurons of interest. The nanotransducers would convert electrical signals from the neurons into magnetic signals that can be recorded and processed by the external transceiver, and vice versa, to enable bidirectional communication.
- The Carnegie Mellon University team, under principal investigator Dr. Pulkit Grover, aims to develop a completely noninvasive device that uses an acousto-optical approach to record from the brain and interfering electrical fields to write to specific neurons. The team will use ultrasound waves to guide light into and out of the brain to detect neural activity. The team's write approach exploits the non-linear response of neurons to electric fields to enable localized stimulation of specific cell types.
- The Johns Hopkins University Applied Physics Laboratory team, under principal investigator Dr. David Blodgett, aims to develop a completely noninvasive, coherent optical system for recording from the brain. The system will directly measure optical path-length changes in neural tissue that correlate with neural activity.
- The PARC team, under principal investigator Dr. Krishnan Thyagarajan, aims to develop a completely noninvasive acousto-magnetic device for writing to the brain. Their approach pairs ultrasound waves with magnetic fields to generate localized electric currents for neuromodulation. The hybrid approach offers the potential for localized neuromodulation deeper in the brain.
- The Rice University team, under principal investigator Dr. Jacob Robinson, aims to develop a minutely invasive, bidirectional system for recording from and writing to the brain. For the recording function, the interface will use diffuse optical tomography to infer neural activity by measuring light scattering in neural tissue.

To enable the write function, the team will use a magneto-genetic approach to make neurons sensitive to magnetic fields.

- The Teledyne team, under principal investigator Dr. Patrick Connolly, aims to develop a completely noninvasive, integrated device that uses micro optically pumped magnetometers to detect small, localized magnetic fields that correlate with neural activity. The team will use focused ultrasound for writing to neurons.

Throughout the program, the research will benefit from insights provided by independent legal and ethical experts who have agreed to provide insights on N³ progress and consider potential future military and civilian applications and implications of the technology. Additionally, federal regulators are cooperating with DARPA to help the teams better understand human-use clearance as research gets underway. As the work progresses, these regulators will help guide strategies for submitting applications for Investigational Device Exemptions and Investigational New Drugs to enable human trials of N³ systems during the last phase of the four-year program.

“If N³ is successful, we’ll end up with wearable neural interface systems that can communicate with the brain from a range of just a few millimeters, moving neurotechnology beyond the clinic and into practical use for national security,” Emondi said. “Just as service members put on protective and tactical gear in preparation for a mission, in the future they might put on a headset containing a neural interface, use the technology however it’s needed, then put the tool aside when the mission is complete.”

Additional details of the program schedule and metrics are available in the 2018 broad agency announcement: <https://go.usa.gov/xmK4s>.

Or we can simply use Tesla’s expertise to formulate the mercury in the mind and or any other metal on the periodic table dependent of the “hosts” chemical and emotional and physical construct, his morality, belief system and his sense of purpose.

The breakout super soldier of acute complex ptsd and thus you didn’t break me you made me and it all feels a little Jason Bourne, though we are making a movie as we go, something that the overall construct of Mr Johnson and his secrets within should see him withdrawn from the frontline.

Unless of course reconciliation and absolute confession are forth coming and with unleveraged free will. (Back to living on a prayer Mr Clarence)

Thus we close with the connection between microwave technology and mercury contamination through food and chemical toxicology

It's a simple read when one resides in the absolute truth in a data transfer system, it affords the insight and digestion of the young Chinese students who literally look at the pages and digest the patterns, you know the super readers, thus.

The potential role of Hg toxicity in cancer was studied since the early 1980s. A review of the existing data by Kazantzis (1981) asserted that despite profound genotoxicity, indications of carcinogenic effects of Hg exposure were lacking (Kazantzis, 1981). However, epidemiological studies performed during the 1990s in occupationally exposed subjects (miners, dentists, chloralkali workers, nuclear weapon industry workers) established a significant association between Hg exposure and cancer risk and mortality (Boffetta et al., 1993), although certain authors link these effects to co-exposure to other toxic agents (Boffetta et al., 1998). At the same time, experimental studies revealed carcinogenic effects of both mercuric chloride (Mitsumori et al., 1981; NTP, 1993) and MeHg (Blakley, 1984; Hirano et al., 1988), though, these studies did not provide any significant insight into the potential mechanisms involved in such effects.

Which brings us to the Bio-tech companies and everyone seeking to profit from the PFOA PSOA – C8 Forever chemical, which is the connector, the nano, particle, the non-invasive technology, that's being sold as the "KINGS" new clothes and being profited from as the raise in frequency is fulfilling the prophecy of America's own storyline.

We've not met Film producer yet that wants to be part of a 12-picture deal to erase the global deficit and repair humanity..... and yet it's the greatest show in town.

And why not, because that's not how Hollywood and the industry works, the audience serve you, not you them and that's the issue, this was a vocational industry and not an investment package until it got dirty, competitive and over stimulated and now it's a junkies graveyard and the biggest one in town is Dwayne Johnson and thus proven we have amongst all that is affecting the world, that his pull on the audience supersedes all rhyme and reason, because when the world got crazy, and the anxiety grew, adults become children and thus all involved obtained the digitally realised adrenochrome .

I am off to obtain the technology to test those in a position of influence, but right now we have a blueprint to build from.

Damian William Langiano
